Project Robotoken whitepapers.

Disclaimer

There are several known opportunities in the crypto industry and governmental organizations are implementing policies and law to tighten financial security within their borders, do well to understand that the aim of this project to create more interest between the earth citizens and the mystery in **"space"**. This blockchain project will not be held accountable for your ignorance and there are legal department associated with the project, more importantly to secure the legitimacy of the project and its team.

Lecience's and approval are not assured in respective jurisdictions.

The robotoken protocol labs interest is to operates in full compliance with applicable laws and regulations and uses its best endeavors to obtain the necessary licenses and approvals. Regulatory licenses and or approvals are most likely to be required in a number of relevant jurisdictions in which relevant activities may take places.

This means that development and roll-out of all of the initiatives describes in the whitepapers are not guaranteed.it is not possible to guarantee and no person makes any recommendations, warranties, or assurances, that any such licences or approval will be obtained within a particular timeframe or at all.the development of any initiatives is intended to be implemented in steps and stages, the project may rely on relationships with certain licensed third-party bodies.

The initiative described and detailed in this whitpapers may not be available in certain jurisdictions or at all.there could be restructuring of these initiatives and /or its unavailability in all or certain respects.

No advice

The content of this whitepapers does not entail any investment advice, financial advice, trading advice or recommendation by robotoken. Its affiliates, or its respective officers, directors, managers, employees, agents, advisor or consultants on the merits of purchasing the nfts or token nor should it be relied upon in connection with other contract or purchasing decision.

Actually, not a means to sales of security.

This whitepapers in any does not entails a prospectus or financial service offering document and its not an offer to sell or solicitation of an offer to buy any security investment product, technical products, regulated commercial products, or financial instrument with any authority.

Translation

This whitepaper and its content with materials inclusive are issued in English. Any translation for reference purposes only and is not certified by any person. No assurance can be made as to the accuracy and completeness of any given translations. Should there be any inconsistency between a translation and the English version of this whitepapers, the English version shall prevail.

OVERVIEW

Ideas and dreams have contributed significantly to the existence of human life, in light of this, for continuity of impact we intend to build a creation uniquely different from the normal. The metaverse and the space project is the core case study for the idea behind the robo token project. Science remains a mystery, as it is far beyond human imagination, the extent and capacity for the depth and huge nature of **"space science"** is globally unknown to more than half of earth population.

The expertise of our team and the integrity of our scientific community has shown our utmost intent, more than ever, the Genuity, credibility and wealth of experience from our research team will not allow us to build just for financial profit. we will provide a brief summary of the key points that describes who we are and how we plan to achieve the project goals. As one of its kind, creativity, innovation, and subtle research are the basic culture of a well-informed scientific community.

The goals is to create a difference now and in the future both in blockchain and in the NFT niche. most importantly our core interest extends beyond successful launching & sales because we are sure to achieve as we progress. As we go further & deeper into research about our planet and the space, we want the earth to experience the value and abundance in the

Founder & co-founders statement.

" we've have been scientist all our life. The interest of the world is our ultimate goals at large. Positive influence and innovation from scientific views has always been the reason behind our actions and inactions. We are passionate about the space and its connection to the planet earth. In line with Elon musk visions, selected and lucky holders of our NFTs will have the opportunity to visit the space and get to experience the abundance and mystery attached."

Table of content

Scientific analyses of banknotes NFTs

With the thriving blockchain era that has large number of investors and venture capitalists interest, NFTs has been and is motivating a more powerful social-economy where players and owners of NFTs have control, our banknotes nfts are uniquely different, as they posess different unique features, this is because we want to communicate a personal sense of value to our holders and give them control over their purchase.

As the blockchain revolution continues we want a share of it, more than ever we are so determined to create such quality and assert ourselves in the space.

When science collides with any industry, the expectation is excellence. More importantly our desires to navigate and influence the blockchain technology is without doubt going to result into rare and unique innovation. Our banknotes nfts its the first of its kind and this is a good reason to implement space science knowledge into the blockchain system

Banknotes nfts is a collection of 5000 denominations NFTs on the Ethereum blockchain, with deep professionalism and craftiness. The project is a relentless works of our tech department and space scientist. We are driven by two forces; the inspiration & ideas of our (co) founders and the interest of the community we are building, as we don't want to digress from the vision of the project.

There are multiple tones of research going on in the background, our community members will be eligible to acquire space artifact, e.g meteorite. If you're a long term holdler of our nfts then its logically certain that you will not experience loss.

The founders **thought** and the community **intents** are the major **initiator** of the next phase of our ideas. The future collections will be 3d avatars, our unique banknotes holders will be eligible to mint this 3d avatars, as they are our valuable community member and project contributors.

We are diving into the future of the internet for continuity, efficiency and above all security(web3). we want our holders to earn from our their own NFTs with the incentives attributes and not just by selling out of the project.

Expansion possibility

Aside the interest and focused we have on our initial plans, as we progress during the course of this plan there will be more structured & innovative plans, this plan will be revealed in steps set in place to achieve greater future goals, our developers are passionate about building and development. This in turn will allow us focus better on other areas of the project because there are strategic measure and guide that validates the accomplishment of the overall achievements.

Blockchain security

Its becoming a custom that there are have been daily news about insecurity on blockchain, we want our community to experience liberty and safety. Unlike other unsecured blockchain ecosystems we are more cautious and professional. The blockchain is Ethereum and there will be transparency among traders & holders. tokenomic operations will be ultra-carefully tracked to monitor any on-chain or off-chain transactions ensuring safety and validity.

The smart contract

The NFTs are built on erc721 and while the future native token ($Robo-token) has been developed on the erc20 blockchain.

Both the erc721 and the erc20 smart contracts are test net launched over multiple versions to find and fix any bulgy issues that may occur in the process of the transaction, this are part of our preventive measures to avoid losses of asset by our community members and or project contributors.

The $robo token smart contract is certified & authentified by leading blockchain audit organization. The audit results, contract source code, and token allocations will be made known to public soon enough, this certainly ensures transparency in our project.

Tokenomics of $ROBO-TOKEN

$Robo-token is a native token of ROBOTOKEN which is built on erc20 smart contract, this token parameter

- ✓ market capitalization
- ✓ technical standard
- ✓ standard issue price
- ✓ currency
- ✓ acceptance private sales
- ✓ public sales duration
- ✓ total supply

- ✓ soft capitalization and hard capitalization
- ✓ sales quota
- ✓ token allocation
- ✓ use of sales proceeds
- ✓ capital collected.
  .

all these parameters are in check, to provide Genuity and correctness of data, our team are currently working relentlessly to verify and provide statistics with proof. We do not want to give false information. We plead that you exercise slight amount of patience, we will submit all proven data in a short timeframe.

Nft trading

Holders of asset including blueprint, characters, booster, and NFTs that can be traded on the marketplace. Transaction are guaranteed to be safe and transparent for each type of asset, be it the banknotes or the 3d avatars there will also be transaction history to identify who has owned that item.

Only players have the right to set price for each type of item, which means the price will depend on market demand. THE ROBO TOKEN TECHNICAL team will monitor transaction security, Listing or delisting will require a small amount of gas fee to confirm the transaction on the marketplace.

STAKING+TOKEN

We have a well-structured strategy and plan whereby we create a staking system that allows you to earn erc20 token (our native token). Its will be possible to stake your NFTs from the main collection or 3d avatar collections. We will reveal the amount of erc20 allocated to all holders of after completion of all minting stages and processes. Our goals and plans are long term, we are moving on a path to success, our community stability and project success is our utmost concern. Stay informed by being active in the community, we are coming out with a unique difference.

TEAM MEMBERS. (ALL Doxed)

We are international group of scientist from Kazakhstan, Ukraine and Africa.

Mazur *(founder)*

MAZUR LEADERSONE is a space scientist with 21 years of research about space, he has actively executed many space projects. he has worked in partnership with some group of NASAs team & roscosmos. Mazur is a strong key player in the robotoken project based on his wealth of experience his contribution can never be underestimated.

Twitter: @mazur.

RSPACEBOY(CO-FOUNDER)

The codename for scientific research that was conducted in the stratosphere is 18th thousand miles, we decided to keep this classified as Rspaceboy lead the team on this project. He is a notable scientist within our community, he has relentlessly work to improve the research works on several space projects with his 17 years of experience he has consistently and continuously visiting the space, Rspaceboy is known for analyzing space artifact.

Twitter:Rspaceboy

Mike exelar (Tech)

Having mike was one of the best decision we've made in the Past 9years, mike exelar is a tech enthusiast professionally working across many niches, he was able to achieve an height of success which has earn him some awards and prestige, he has worked with several private military sector and non-governmental organization as a CTO (chief technology officer).

TWITTER: @mikeexelar

JASPER STEVENS - *(marketing).*

Jasper Stevens is an expert in digital sales, product-marketing & crypto-marketing with proven track record of success, with over 6years of marketing experience, he has worked with several successful community in the crypto space. Jasper is well known for his ruthless marketing skills, community stability and development. He is also a scientist in the medical field who graduated to develop interest & passion in the crypto-industry.

ROADMAPPING

The robotoken roadmap is a systemic compilation of the outlined plans and this does not in any ways relate with the whitepaper, often times the two words are used interchangeably, which in turns leads to the lack of proper understanding of each. The whitepaper is a detailed information of how we tend to help the social-economy at large with our project and the benefits, solution, and analysis connected to holding our project be it the nfts and or the token. While the **roadmaps** are summary of steps created to simplify the state of progress. As the name implies the maps that allows you to understand how we are progressing. Below is the breakdown of our roadmaps.

Creation of NFTs the banknotes nfts are the founding nfts we created with an exclusive collection of 5,000 piece available for minting, and without the banknotes nfts you're most unlikely to purchase our 3d avatars nfts from secondary market. It is advised that each community members work towards the minting dates as there are limited pieces of the banknote nfts.

Creation of website 1.0 the websites is the means to reach million across the globe and more necessary a channel for information about the project and the team behind it. We will upgrade in due time as there will be flexibility in structure and progress.

Community building; Twitter and discord (ETH giveaways, collabs, cash rains, bonuses, and lastly task are all performed in the twitter & discord community respectively)

Deployment of tokens ($ROBO). The token will be available on presales after which we will now proceed to list it on several popularly known decentralized exchanges **(DEXES)** and a reasonable amount will be airdropped to our community members who holds the bank notes nfts.

Upgrade of website to standard. the previous version was initially launched to give a taste of what we are capable of building, as we journey on, we have intention of upgrade in other to serve the community better.

Marketing and brand awareness. As we all know the power of marketing can never be underestimated, we have put together a team of experienced expert in the field of marketing that will professionally and tactically introduce our presence in the non-fungible tokens atmosphere. Our faith work in alignment with the faith of the community members, we are slowly putting to work because moving at a fast pace can logically crumble our long-term efforts, in other to avoid this, we will keep building slowly and steadily for the success of our community and our members.

Server Safety & Security. To avoid hackers and scammers on the discord server we urge you to do the **2FA AUTHENTICATION**. It's a means to defend you from hackers who actually want to spam you to click on links and get access to your wallet. as prevention is better than cure do well to follow all safety precautions see you after lauch date.
